As a user of XM radio I enjoy the service and that which they provide. I am tired of the government and special interest groups taking away my RIGHT to listen to what I want where I want and when I want. The braodcasters have done that to me on satellite TV as well and have sold a bunch of idiot congressman the idea that they need to keep a monoply going. Let XM provide the consumer with what we want not what someone else wants for us. Never forget we were once free and would like to remain that way once again. Reject petition 04-160 as not being in the best interest of a FREE country and supposed free society.
